

## CL2005 – Database Systems Lab

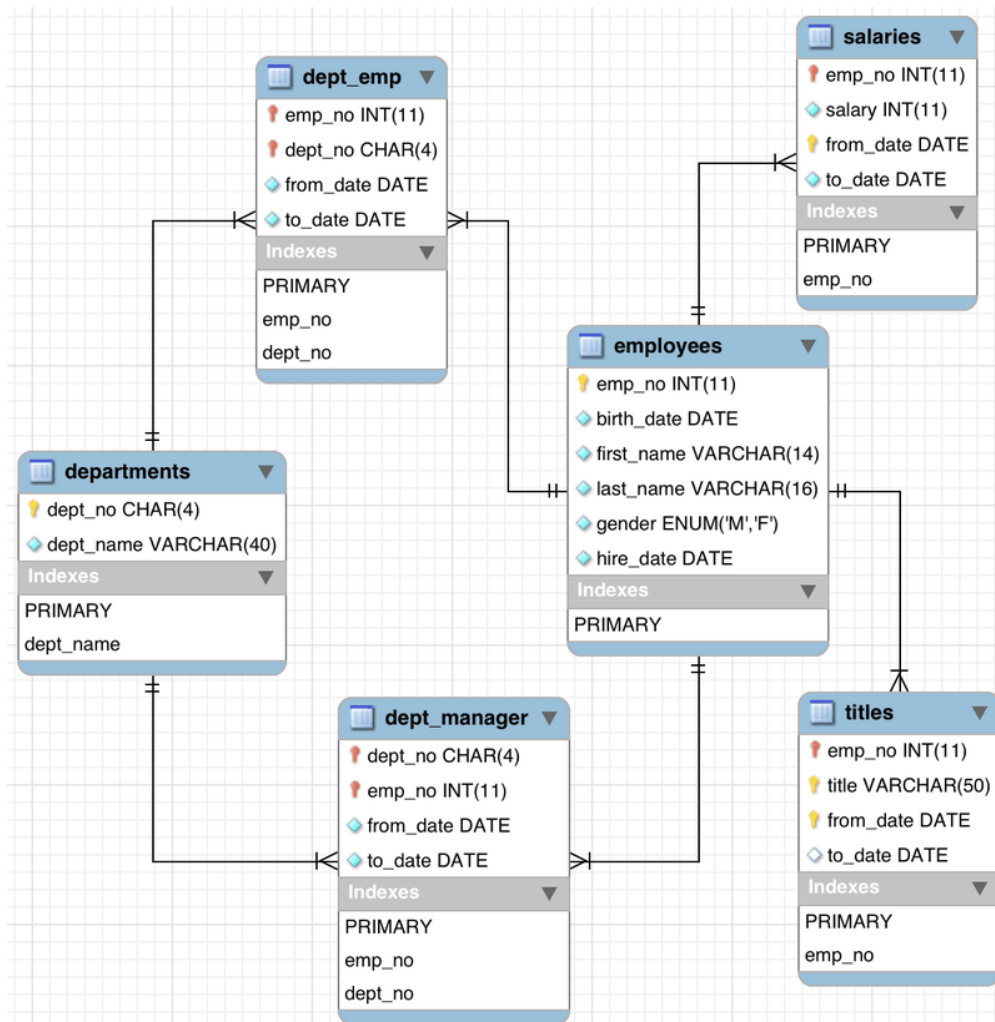

### Assignment # 01

**Note:**

- Copied task will be awarded **zero** marks.
- No Late submissions will be accepted.

### Question # 01

- Create a database named organization.
- Create all the tables with primary and foreign key constraints as shown in figure.

**1. INSERT data in each of the tables.**

- I. Add a couple of employees and a couple of departments.
- II. Add an existing employee in a department by inserting data into the dept\_emp table.
- III. Add salaries for the added employees.
- IV. Add employee titles and managers of the departments.

**2. UPDATE a number of records.**

For Example:

- I. Change department of an employee.
- II. Update an employees' salary.
- III. Change the name of a department.
- IV. Change an employees' job title.
- V. Change an employees' hire date.

**3. DELETE a couple of records.**

For example:

1. DELETE every employee who was hired before February 2016.
2. DELETE all departments. etc.

Submit a employee.sql file which contains all the commands of:

- creating tables.
- Inserting data
- Updating data
- Deleting data.

Label your queries properly.
